

Style Guide

For writing code in Django (including HTML templates):

- <https://docs.djangoproject.com/en/dev/internals/contributing/writing-code/coding-style/>
- No Magic Numbers
- Descriptive Variable Names
- Refactoring duplicate code
- DRY - Don't Repeat Yourself
- 1 empty line between end of one function and beginning of the comment block (of next function)
- Tabs for python (equal to 4 spaces), Spaces for HTML templates (2 spaces)

Comments:

- Describing how a function works
- For any complex blocks
- Comments are understandable from third party perspective
